GRANDE PRAIRIE AND SEXSMITH SCHOOL FAIRS OUTSTANDING SUCCESSES

Quality of Exhibits at Local School Fair Fully up to High Standard Set in Other Years

The Grande Prairie School Fair, held in the R. P. O. E. Hall on Tuesday, September 12, attracted a great deal of interest and after the doors were thrown open following the judging the big hall was filled to capacity with adults and school children. Considering the weather that prevailed at the beginning of the month, the vegetable showing was truly remarkable. It was the opinion of the judges that, though there were not many entries as in previous years, from the standpoint of real quality this school fair surpassed any other fair since they were started six years ago by P. H. Dixon.

This year there were two less schools represented than last year. The art department proved most interesting, there being many clever exhibits. Splendid map drawings were also a highlight of the fair.

There was only a fair exhibit of live stock. In the bacon hog class a pair exhibited by Everett Sheehan were outstanding. A great attraction, especially for the kiddies, was the goat exhibit, in which eight animals were shown. This was the first exhibit of the kind ever seen at a school fair held north of Edmonton.

The flower show, owing to the frost, was not as attractive as the one last year. However, there were some splendid showings which had survived the killing frosts which had hit the area.

The following were the judges: Vegetables—W. J. Thomson, P. H. Dixon and Frank Clarke. Livestock—W. J. Thomson, P. H. Dixon and J. Murdoch. Sewing—Grace Whelan. Cooking—Jean Cochran.

During the afternoon each of the judges gave a short talk on the exhibits. The school fair held here on Monday last was well attended and the quality of the exhibits was good, and better than last year, also there were more entries than in 1932.

The live stock exhibit was an improvement over last year, both as to numbers and quality. There were 15 entries in the best yearling class and 16 in the dairy calf class. The first award in both these classes went to pure breeds.

One man who purchased a dual purpose Red Fries was offered \$100 for the lot of this cow. The offer was turned down.

There was a good list of entries in the sheep class. J. Murdoch of the Dominion Live Stock Branch judged the live stock and vegetables.

High-Level Bridge Near Pouce Coupe Officially Opened

Upwards of 300 attended the official opening of the new high level bridge two miles north of Pouce Coupe on Thursday last.

Others who spoke were Mr. Atkinson, Mrs. E. Crawford, W. A. Reas, Jack, president of the Dawson Creek Board of Trade.

The chairman then called upon L. H. Miller to cut the ribbon. An oldtimer's wagon, driven by Andy Callahan, who was a pioneer settler by Jack Rieley, two oldtimers, was the first vehicle to cross the bridge. The honor of driving the first automobile over the bridge went to Dr. Watson.

The following are the officials: President, N. Chappel; vice-president, George Palmer; secretary-treasurer, P. H. Sanger-Davies.

The executive is composed of a representative from each school district. On page five will be found a complete list of the prize winners.

Opening of The Lymburn W. I. Hall

Friday evening last, September 8, was a notable one in the history of the Lymburn district, since it was the occasion of the opening of the Lymburn W. I. Hall.

This organization, which has hardly three years old, may well be proud of its first public demonstration. The hall was well built and roomy, with a removable stage and a good dance floor.

Supplies a real need in the district and there is evidence that it will be of great value to the community.

At the opening of the hall, Mrs. McKelvie, president of the Women's Institute, introduced Mrs. D. W. Patterson, constituency convener of the Grande Prairie Women's Institute, to perform the ceremony of opening the hall.

SEARCH FOR CRUDE OIL

Will Endeavor To Locate Field in Alberta To Renew Diminishing Supplies

Efforts to locate crude oil in Alberta will be renewed immediately by the Imperial Oil Company. It was announced recently. Work will start on the Comey structure, consisting of 7,000 acres, about 100 miles south of Medicine Hat, near Manyberries. J. H. McLeod, production manager for Imperial Oil pointed out that large quantities of crude had to be imported for blending with the asphalt from Turner Valley oil fields of Alberta. He said Montana supplies were diminishing rapidly and there was a possibility unless crude oil was located in Alberta soon it would have to be imported from distant fields.

LIVES HIGH ABOVE WORLD

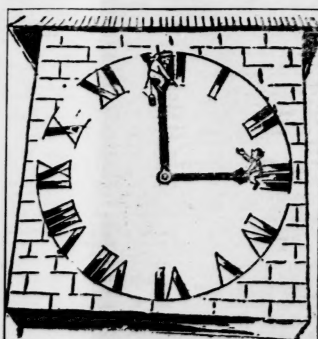

Perched on a narrow patch of crumbled rock, 4,130 feet above sea level, where he lives all summer as one of the provincial government's Bow River forest reserve guardians, Arthur Shantz told a reporter that "it'd be all right if I could keep the place warm and the government would give me enough paint to cover the cabin."

Those were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 30 feet wide by 50 feet long.

The lumber for the shack occupied by Shantz, who likes to call himself the "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

COUGARS MENACE RANCHERS

Residents of Port Alice, on the west coast of Vancouver Island, with the streets armed with shotguns and rifles to protect themselves and their property against marauding cougars that descend almost daily on the town.

Having exterminated the deer and fur-bearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and hoppers, practically all the dogs have fallen prey to them.

This information was brought by Dr. William Greiver, of Port Alice. "Unless drastic action is taken soon many of the ranchers will be forced to abandon their ranches," Mr. Greiver said.

RUSSIANS CANNOT OWN DOGS

In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to special dog pounds. The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in this manner, sufficient for the army's requirements.

BRITAIN TO BUILD SHIPS

A substantial addition to the British navy, including several cruisers, destroyers and submarines, is being planned as a reward to the recent shipbuilding programs of the United States, Japan, France and Italy. The Admiralty is understood to be planning to provide for the program in its next budget. The ships, however, cannot be completed before 1936, because of the London naval treaty.

JAPAN STAGES SHAM BATTLE

Fifteen million people in Tokyo and surrounding prefectures tasted war-time life when a sham battle for possession of the capital was launched by the army and navy.

Three times during the day "enemy" aeroplanes roared overhead and sirens screamed warnings to the populace. Smoke bombs and vari-colored vapors were blown in the streets, simulating poison gas and incendiary explosives.

Emergency hospitals were set up and to them stretcher-bearers, bearing gas masks, carried the supposed wounded, while from public parks and the roofs of big department stores anti-aircraft guns and machine-guns boomed and chattered.

There was one genuine casualty. A girl watching one of the air raids from a roof fell and was killed.

The assumption was that the air raiders came from enemy battleships approaching Tokyo Bay from the mid-Pacific. The whole show formed the second phase of the grand air manoeuvres of the navy.

people are miles from town, some of the men get in once a year but not the women. There are no community interests except a community dance in two weeks, and their dancing is the most quiet I have ever seen.

The first winter I was there we established a community night once a month and put on our own program. It was a success and everybody supported it with their whole hearts. There were singing games, and plays or two. The girls in their own room shared is something that I have never seen before. I have to have this called over a month, in the nature of letting off steam, which is necessary in everybody's life. This is the problem of pain and sickness. I have seen many mothers who are healthy, but it is something for mothers to know that there is a doctor 15 or 20 miles away to whom they can turn if necessary. Last year a man wrote his wife twenty miles back in the bush, they brought him in three miles from Dismal, and we made our own spirits and set it with eight children and the mother looking on.

"Our winter evenings start at 4:30 and go on all night. The people have few community interests and nothing to read. I have had a very long list of friends from all over the Dominion have been sending literature and we have now 5 leading libraries and some of the school children come in from the town and take them three times a week and get a book each time.

"One afternoon a little Polish girl who had just come into the district came into my office for medicine and I gave her a very long list of friends from all over the Dominion have been sending literature and we have now 5 leading libraries and some of the school children come in from the town and take them three times a week and get a book each time.
